

Who We Are

Boyd Watterson Asset Management, LLC is an SEC-registered investment advisory firm with \$19.5 billion of assets under management*. For 90+ years, we have successfully managed a broad range of fixed income and equity strategies for institutions and individuals alike. With a focus on the management of money and a dedication to the satisfaction of our clients' expectations, we offer the benefits of a boutique firm but with the resources usually attributable to much larger asset-management companies.

Our Philosophy and Process

Our fixed income philosophy is centered on our belief that over time, active management may consistently generate excess returns and enhance risk-reward tradeoffs. We believe this is best achieved by taking a more strategic view of macroeconomic and market factors and coupling them with a value-driven decision-making process and the rigorous application of risk-management controls.

Our process focuses on four key sources of excess return or "alpha-drivers" as follows:

- Duration Management
- Sector Allocation
- Yield Curve Positioning
- Security Selection

For each alpha driver, there are specific fundamental factors, momentum indicators, and valuation measures which are analyzed. These sources of alpha are then combined and weighted depending upon product type and scope of the client mandate.

At all stages of the portfolio construction process, risks are identified, measured, and managed as part of the portfolio construction process, which seeks to ensure the desired risk levels are maintained. This is a highly disciplined, team-managed approach which remains fully invested in what we believe to be attractively valued sectors and securities.

As a result, portfolios are generally expected to outperform the applicable targeted benchmark(s). We believe this is achieved with transparency and without the use of leverage and/or derivative securities.

The Boyd Watterson Value Proposition

- Time-tested philosophy and investment process
- Disciplined, fundamental research-based culture
- Balanced investment approach - top down/bottom up
- Transparent portfolio implementation
- Experienced, tenured team of investment professionals
- Client-oriented benefits of a boutique firm

Objective

High Quality Intermediate Municipal is a well-diversified† strategy that seeks to generate attractive levels of after-tax income with the primary focus on AA-rated securities.

- High levels of current after-tax income
- Highly diversified across sectors and securities
- Low levels of expected return volatility
